Nursing Care At The End

Nursing Care at the End of Life: What Every Clinician Should Know should be an essential component of basic educational preparation for the professional registered nurse student. Recent studies show that only one in four nurses feel confident in caring for dying patients and their families and less than 2% of overall content in nursing textbooks is related to end-of-life care, despite the tremendous growth in palliative and end-of-life care programs across the country.

Nursing Care at the End of Life: What Every Clinician ...

Nursing Care at the End of Life: Palliative Care for Patients and Families explores the deep issues of caring for the dying and suffering. The book is based on the Hospice Family Caregiving Model previously published by the author and focuses on the practice implications of care for the dying. The book is written in a clear and user-friendly style, and is ideal for undergraduate nursing students learning about dying, suffering, and caring for individuals and their families.

Nursing Care at the End of Life - Simple Book Publishing

Book Description: Nursing Care at the End of Life: What Every Clinician Should Know addresses an essential component of the basic educational preparation for the professional registered nurse student. Recent studies show that only one in four nurses feel confident in caring for dying patients and their families and less than 2% of overall content in nursing textbooks are related to end-of-life care.

Nursing Care at the End of Life - Open Textbook

Most end-of-life care content is scattered throughout nursing programs, if at all, and there usually is no specific course or textbook that focuses on the subject. Although only a small percentage of nurses practice in the specialty of palliative care and hospice, all nurses should have educational preparation in end-of-life care because of the widespread contact nurses have with people at the end of life.

Introduction - Nursing Care at the End of Life

While care after death is the last act of nursing care, it is the first step of a pathway that ultimately leads to burial or cremation. The pathway involves many professional groups including nurses, doctors, porters, mortuary staff, pathologists, coroners, funeral directors and bereavement teams.

Personal care at the end of life and after death

Decisions about care at the end of a person's life often involve quality-of-life considerations. Nurses are obligated to provide care that includes the promotion of comfort, relief of pain and other symptoms, and support for patients, families, and others close to the patient.

Nurses' Roles and Responsibilities in

Sit down with the spouse and engage in conversation about the pt's care needs. The spouse of a pt with end stage renal disease sits quietly at the pt's bedside, staring at the pt as the pt slips into a coma. What should the nurse do at this time? Administer acetaminophen as prescribed
