SKF radial shaft seals are manufactured to the outside diameter tolerances listed in the table, for metric seals, and in the table for inch-size seals. These are, where standardized, in accordance with ISO 6194-1, DIN 3760 and RMA OS-4.

### **Technical Specification | SKF**

Nitrile seal life decreases by a factor of two for every increase in temperature of 57 degrees F. The oil level can be another factor in a lip seal's lifespan if it is too low. In this situation, the seal will eventually become hard and not be able to follow the shaft, resulting in leakage. Cold temperatures can cause seal embrittlement.
