In figure 24.1, the creation of electric field at point P continues to propagate towards right. As wave is propagating after a time one fourth of the time period from figure d, the negative charge moves to the top of the antenna by leaving the same magnitude of positive charge at the bottom. Thus, the conventional current (due to negative) in the antenna is pointed downward direction.

Glencoe - Physics - Principles and Problems [textbook ...

A physics exercise does not really become a problem until you accept the challenge it offers and attempt to solve it. Once you have chosen to make it your problem, you have a personal interest in finding the solution. Each chapter of this workbook is divided into two or more topic sections that begin with some physics theory.
