Page 2 The Piper J-3 Cub Story The yellow Piper J-3 Cub is one of aviation's genuine classics. In the decades right before and after World War II, the Piper Cub was the most commonly seen lightplane at airports all over the country. It's been said that back then most people thought that every airplane flying was either a DC-3 or a Piper Cub.

Piper J-3 Cub - The airplane that taught America to fly The Piper J-3 Cub, the best-known light plane of all time, became the Model T of aviation. Built by the thousands for both civilian and military use, the J-3 has been flying since prewar 1938. By December 1941, one-third of all the airplanes in America, and nearly two-thirds of all the light planes, were Piper Cubs.

Before beginning the assembly of the Piper Cub 40, remove each part from its bag for inspection. Closely inspect the fuselage, wing panels, rudder, and stabilizer for damage. If you find any damaged or missing parts, contact the place of purchase. If you find any wrinkles in the covering, use a heat gun or sealing iron to remove them.

Piper J-3 Cub - Horizon Hobby

Your Great Planes Piper J-3 Cub 20 is not a toy, but rather a sophisticated, working model that functions very much like an actual airplane. Because of its realistic performance, the Cub 20, if not assembled and operated correctly, could possibly cause injury to yourself or spectators and damage property. To make your R/C modeling experience ...

Cessna Manuals - Aviation manuals & news site

The Piper J-3 Cub was the most popular commercial aircraft of the 1930's. Barely seven yards long and instantly recognizable in its yellow-and-black paint scheme, this nostalgic favorite became the foremost trainer of the era, eventually training 80% of the United States' military pilots by the end of World War II.
