Consists of a modified, heavy-duty door closer for manual operation, with a pneumatic air cylinder to automatically operate the door when required. Power for the operator comes from an air compressor or in-house air supply. Pneumatic operators are silent, making them ideal for use in libraries, churches, hospitals and laboratories.

What are Pneumatic Automatic Operators?

pneumatic system when the compressed air is allowed to expand. For example, a tank is charged to 100 PSIA with compressed air. When the valve at the tank outlet is opened, the air inside the tank expands until the pressure inside the tank equals the atmospheric pressure. Air expansion takes the form of airflow.

Introduction to Pneumatics and Pneumatic Circuit Problems ...

This FIBC (Super Sack) bulk bag filling station features automatic pallet dispensing, bag hooks that retract toward the operator, automatic weighing, densification, and conveying. This station has it all - a turn-key package that saves on labor costs and measurement accuracy. We call this the FWP-7000 bulk bag filling station.
