### Polar Bear Panda

The polar bear (*Ursus maritimus*) is a hypercarnivorous bear whose native range lies largely within the Arctic Circle, encompassing the Arctic Ocean, its surrounding seas and surrounding land masses. It is the largest extant bear species, as well as the largest extant land carnivore. A boar (adult male) weighs around 350–700 kg (770–1,540 lb), while a sow (adult female) is about half that size.

### Polar bear - Wikipedia

Majestic creature of the far north, the polar bear is the world's largest terrestrial carnivore. Its Latin name, *Ursus maritimus*, means 'sea bear': an apt name for this amazing species which spends much of its life in, around, or on the water - predominantly on the sea ice.

Knut (German pronunciation: (); 5 December 2006 – 19 March 2011) was an orphaned polar bear born in captivity at the Berlin Zoological Garden. Rejected by his mother at birth, he was raised by zookeepers. He was the first polar bear cub to survive past infancy at the Berlin Zoo in more than 30 years.

### Knut (polar bear) - Wikipedia

The loss of sea ice habitat from climate change is the biggest threat to the survival of polar bears. Other concerns for polar bears include lethal response to human-polar bear conflict, toxic pollution in the environment, and direct impacts from industrial development, such as disturbance of maternal dens or contact with an oil spill, and potential overhunting of some subpopulations.
