Psychology | Undergraduate Catalog

Evolutionary psychology is a theoretical approach in the social and natural sciences that examines psychological structure from a modern evolutionary perspective. It seeks to identify which human psychological traits are evolved adaptations – that is, the functional products of natural selection or sexual selection in human evolution. Adaptationist thinking about physiological mechanisms ...

Evolutionary psychology - Wikipedia

The sense of smell, or olfaction, is the special sense through which smells (or odors) are perceived. The sense of smell has many functions, including detecting hazards, and pheromones, and plays a role in taste.. It occurs when an odor binds to a receptor within the nasal cavity, transmitting a signal through the olfactory system. Glomeruli aggregate signals from these receptors and transmit ...

Sense of smell - Wikipedia

Globus sensation is the only symptom in 50% of patients (Harar et al. 2004) Concomitant symptoms seen with primary complaint of globus sensation (50% of patients): Throat clearing, dryness, soreness (most common- Rowley et al. 1995) Heartburn (20% of anyone with globus complaint- Harar et al. 2016)

Similar cases (as those who study visual perception know far better than I) are observed in the so-called ambiguous figures, such as the Necker cube. Again, the perceptual system tries to find the underlying structure of which the image is the surface form, by asking what three-dimensional object could have produced this retinal image.
