Soap Manufacturing Technology Details. Today, the bar soap industry is thriving in much of the world, especially in the developing countries. There, toilet and laundry bar soaps are produced in large quantities and there are many producers besides the large multinational firms. In the rest of the world "boutique" soap manufacturers are ...

Soap Manufacturing Technology - Knovel
The use of ammonia as an alkali for soap-making purposes has often been attempted, but owing to the ease with which the resultant soap is decomposed, it can scarcely be looked upon as a product of much commercial value. H. Jackson has, however, recently patented (Eng. Pat. 6,712, 1906) the use of ammonium oleate for laundry

Soap manufacturing technology (eBook, 2009) | WorldCat.org
Soap is a salt of a fatty acid used in a variety of cleansing and lubricating products. In a domestic setting, soaps are surfactants usually used for washing, bathing, and other types of housekeeping.In industrial settings, soaps are used as thickeners, components of some lubricants, and precursors to catalysts.. When used for cleaning, soap solubilizes particles and grime, which can then be ...
