Statics Strength Of Materials Onouye

Statics and Strength of Materials for Architecture and... Barry S. Onouye; Kevin K... \$ 44.99

Fayetteville Technical Community College

A structural support is a part of a building or structure that provides the necessary stiffness and strength in order to resist the internal forces (vertical forces of gravity and lateral forces due to wind and earthquakes) and guide them safely to the ground. External loads (actions of other bodies) that act on buildings cause internal forces (forces and couples by the rest of the structure ...
