Us Navy Anchoring Manual

Introduction The purpose of this publication is to make available a number of the more frequently used commands and orders. Standardization of commands and orders will reduce the number of mistakes which result from misunderstanding and misinterpretation. All hands should be reasonably familiar with all commands and orders listed. All hands should be thoroughly familiar with the commands used ...

Manual of Commands and Orders, 1945 - United States Navy

An anchor is a device, normally made of metal, used to secure a vessel to the bed of a body of water to prevent the craft from drifting due to wind or current.The word derives from Latin ancora, which itself comes from the Greek ἄγκυρα (ankýra).. Anchors can either be temporary or permanent. Permanent anchors are used in the creation of a mooring, and are rarely moved; a specialist ...

The United States Navy occupational rating of boatswain's mate (abbreviated as BM) is a designation given by the Bureau of Naval Personnel (BUPERS) to enlisted members who were rated or "striking" for the rating as a deck seaman. The colloquial form of address for a boatswain's mate is "Boats". The rating of Boatswain's Mate dates from the American Revolutionary War and was one of the oldest U ...

TweetShare198SharePin198 Shares If you drive a car or even ride a bicycle, you might be well aware of the necessity of lighting systems (though in the second case the word 'system' doesn't quite apply) for the safety of you and the people around you. The thing applies just as well for ships. But since they [...]

Storage tanks, bunker tanks, fresh water and ballast tanks are constructed as per the class, size and type of the ship. To maintain ship's stability, equilibrium, and hence the safety it is necessary that the level of the fluids is checked at regular intervals of time.The process of checking level of fluid in various tanks of ship is known as "sounding" of the tanks.
